THE INDEPENDENT JOURNAL OF THE LARGE FORMAT MOTION PICTURE INDUSTRY

LF examiner®

Special Edition Yearbook Number 1

1998 Large-Format Bookings Yearbook

You are holding the first annual *MaxImage! Bookings Yearbook*, a compilation, update, and analysis of the monthly tables of LF bookings published in each issue of *MaxImage!* With this yearbook we hope to give the LF world a clearer picture of the state of our industry as it embarks on a period of unprecedented growth and change.

The *Yearbook* contains several new analyses, published here for the first time, of the year's bookings data. In addition to bookings counts by film, we have tabulated films per theater and average booking lengths. We show, for instance, that the average booking in 1998 was nearly two months shorter than that of just the year before. The *Yearbook* also presents a chart showing the box office performance of the films that reported their grosses. (Notes at the end of this article provide additional detail about our data and methods.)

Everest tops the charts

Unless you've been living in a cave for the last year, it will come as no surprise that ***Everest*** from **MacGillivray Freeman Films** garnered more bookings in 1998 than any other LF film: 106, more than twice as many as any other, save one (***Thrill Ride***, with 61 bookings). Achieving 100 bookings is not unprecedented; ***Africa: The Serengeti, The Dream is Alive, Grand Canyon, and The Living Sea*** are said by their distributors to have done it. However, *Everest* is the first LF film to actually appear on 100 screens in less than a year. (*See page 16 for the complete 1998 bookings count.*)

The number 100 is important beyond its symbolism as a threshold: it currently represents about half of the practical marketplace of LF theaters. Although the worldwide inventory of LF screens stands at about 260 (*see* MaxImage! *April 1999*), at least 50 or 60 of these theaters are not in the market for new titles, either because they run a destination film or other program exclusively or, in the case of some Asian theaters, because they are for all practical purposes closed.

Thus a film that reaches 100 bookings within the relatively short period of a year deprives its competitors of a significant portion of the available booking slots. This is borne out by the fact that, according to our numbers for 1997, the number-one film that year, ***Special Effects***, won only 13 more bookings than its closest rival, ***The Living Sea***, a significantly smaller gap than the 45 that separated *Everest* and *Thrill Ride* in 1998.

Even its makers admit that *Everest*'s popularity was the result of unique circumstances that are unlikely to be duplicated by any future film. But that's not stopping others from trying. **Imax Corporation** and **Walt Disney Pictures** have begun the process of selling ***Fantasia 2000*** to LF theaters in the U.S., with the stated goal of 100 bookings by opening day, Jan. 1, 2000. The appeal of the *Fantasia* name and Disney's legendary marketing acumen, among other factors, give Imax and Disney a fair shot at attaining this ambitious goal.

However, the ability of any one film to dominate the marketplace is constantly being weakened by two trends: the increase in the number of theaters, and the shortening of the average booking. The former was described in the April issue of *MaxImage!* The latter is discussed below.

More films, shorter runs

For most of the LF industry's first two decades, theaters usually had only one film on their schedules, and kept that film for six months, a year, or more. But the average number of LF features released each year has more than doubled every decade, from two in the 1970s to about four and a half in the 1980s to about ten in the nineties. This boom in production has led most theaters to run two, three, or more films at once, each for a shorter run.

Today, a typical theater shows at least three titles: an "A" film, the most recent acquisition, holding the majority of the schedule slots; a "B" film (or two) filling in the rest of the daytime shows; and an evening film or combination program. After two to five months a new film will open, taking over the A position, while the former A becomes the B and the old B drops down or off the schedule.

Table 1 shows the number of films run in 1998 by the top 105 theaters. Our data

(continued on page 3)

(continued from page 1)
indicate that the average number of titles run by theaters each year has increased from an average of 4.3 in 1997 to 5 in 1998. In 1997 only 10 theaters (only 4.3% of theaters worldwide) showed more than 10 films. In 1998 that number jumped to 25, or about 9.5% of all theaters.

The trend toward shorter bookings is part of the industry's conventional wisdom, although evidence for it has been largely anecdotal. *MaxImage!*'s quantitative analysis of our bookings data – the first such analysis to be made public – confirms this "common knowledge."

Using a select subset of the listings published on the following pages, we have calculated that the average booking in 1998 ran for 297 days. This is down from 1997's average of 350, an astonishing drop of nearly two full months in just one year. (See Note 1 below for a description of our statistical methods.) With even more films due in 1999, there can be little doubt that runs will continue to get shorter.

These facts have put the squeeze on distributors and filmmakers, who must compete against more films for shorter runs. The growth in new theaters only partially offsets a significant decline in revenue per film. Filmmakers have been insisting for years that they need a larger share of the box office, but the law of supply and demand seems to be working against them. In 1999 the number of theaters will increase by 22%, from 263 to 321. But the new films released in 1999 will increase the total in active distribution by about 29%, from 63 to 81.

Reporting Grosses

With the release of ***Wings of Courage*** in 1994, **Sony Pictures Classics** became the first LF distributor to routinely report weekly gross domestic box office receipts to the film industry trade publications. For Sony, this was simply a matter of applying to its LF films the procedures that were already in place for its conventional releases. In the next few years, ***Across the Sea of Time*** (1995) and ***Thrill Ride*** (1997) also appeared in the trades' lists. However, during that time no other LF distributor found it worth the effort of collecting twice-weekly reports from every theater showing the film, tallying the results, and reporting them to ACNeilsen EDI, which collects and disseminates box-office data.

Once again, *Everest* changed everything. Knowing they had a hit on their hands, MacGillivray Freeman decided to report the box-office data and in March 1998 *Everest* opened at number 20 on the list of the week's highest grossing films, against such conventional competitors as *Titanic* and *Good Will Hunting*. By the end of May, *Everest* had hit 10th place, the first LF film to rise that high. The film's popularity, as quantified in the weekly charts, drove a second wave of publicity, and drew the attention of investors and market analysts to the LF medium. Imax kept the momentum going by reporting grosses for ***Africa's Elephant Kingdom***, ***T-Rex: Back to the Cretaceous***, and ***The IMAX Nutcracker***'s second annual appearance. Sony's ***Mark Twain's America***, released last summer, also made the charts.

These eight LF films (WOC, ATSOT, TR, Everest, IN AEK, MTA, Trex) have held their own in the lists of the top 60 films in release. Major Hollywood films open on as many as 3,000 screens domestically (out of a total of 34,000 in the country) but the top ten titles seldom gross more than $10,000 per screen per week. On the other hand, LF films, appearing in only a few dozen venues (out of 108 in the U.S.) are usually the week's highest per-screen earners, making five figures more often than not. In its second week, *Everest's* per-screen average broke $100,000, a feat rarely achieved by conventional films.

It should be noted that if all giant screen films reported their box-office income, LF could dominate the listings. If one compares the numbers of bookings for films that did report to those that did not, it is clear that *Africa,* ***Alaska: Spirit of the Wild, Mission to Mir; Super Speedway***, and ***Whales*** would have made the charts during most or all of 1998. And chances are good that at least another dozen or so films would have been in the top 60 for some part of the year. If instead of two or three films here and there, ten or fifteen of every week's top grossers were LF films, the LF business would command significantly more respect and attention from the rest of the film industry than it now receives.

A few months ago, *MaxImage!* called for LF producers and distributors to provide this information, and offered to help in its collection and dissemination. We have since learned that with only one or two exceptions, those that are not now reporting seem to have no plans to do so in the near future. Some cited the expense involved, others the bureaucratic obstacles

(continued on page 4)

(continued from page 3)

to disclosing data that have long been considered confidential, and still others said they saw no benefit to them from reporting.

We consider all these excuses shortsighted and believe this reluctance is holding back the further growth of the industry. All businesses thrive on accurate and timely information. The growing popularity of *MaxImage!* demonstrates this. We again urge all filmmakers and distributors to begin reporting box-office data for all their films as quickly as possible.

Note 1

To calculate the average booking lengths mentioned above, we combined contiguous A, B, and E listings, which for completeness' sake are shown as separate entries in our regular bookings lists.

We excluded:

- Films with only one booking (this tended to eliminate certain destination films with extremely long runs at their home theaters that would have skewed the results);
- Film festival showings of less than 28 days;
- School bookings (films shown irregularly to school groups, but not on the regular public schedule).

We then averaged the lengths of the following subset of all bookings:

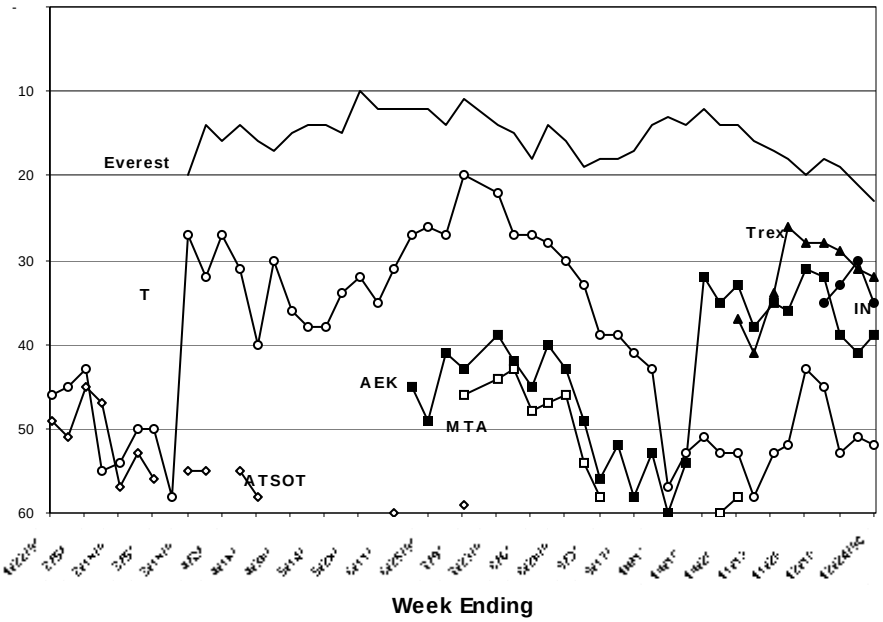
- Bookings that started or ended in 1998 (they need not have taken place entirely within 1998);
- Bookings for which we have precise starting and ending dates (we are sometimes told only the month that a film starts or ends; others have no set end date);
- Bookings that ended by March 31, 1999;
- Bookings in theaters that opened before Jan. 1, 1998.

The result for 1998 was 487 bookings of 53 films at 140 theaters with an average booking length of 297 days.

Although our records for 1997 are less comprehensive than the 1998 data, we are confident that the 297 bookings of 37 films at 113 theaters (gathered using the method outlined above) are numerically sufficient and typical enough to provide a credible average of 350 days.

1998 U.S. Box Office Rank

(of LF films that reported grosses)



Acknowledgements

I would like to thank the dozens of theater managers around the world who complete the bookings surveys we send them several times a year. Their responses provide the precise and detailed information on bookings that form the heart of our database.

MaxImage!'s bookings data would also be substantially less complete without the nearly universal cooperation of the LF industry's distributors. I would like to extend special thanks to my contacts at the distributors who cheerfully and promptly supply me with data, occasionally, when I'm behind schedule, on very short notice.

Bookings: 1998 by film

1,354 bookings of 88 films in 230 theaters

The data on the following pages are **not** warranted to be comprehensive or accurate in every detail, despite our best efforts to make them so. They have been compiled from surveys of LF theaters, distributors, the World Wide Web, and other sources.

We will make every effort to improve the thoroughness, accuracy, and usefulness of these data. If your theater or film is not shown here, please get in touch with us to update our listings.

Where a date is not shown, it means that no date was provided by the source or, in the case of a closing date, that no date has been set, or that the run is indefinite.

The key to film abbreviations is on page 16.

Key to Status:
A - most frequent or only show.
B - any other regularly scheduled film.
E - evenings or weekends only.
F - festivals or run of less than one month.
S - irregularly for schools, not on public schedule.
